PROFESSIONAL SUMMARY

Data Science undergraduate (BSc Information Technology, Specializing in Data Science) at SLIIT Northern University, currently completing a Data Science internship at DecodeLabs, building enterprise-grade ML data pipelines in Python with pandas, scikit-learn, and Pandera. Skilled in data cleaning, feature engineering, statistical modeling, and machine learning, with applied experience in NLP and large language models. Second Place winner at ThinkAI Expo 2025 for AI research. Seeking to apply analytical and machine learning skills to real-world data challenges.

EDUCATION

BSc (Hons) in Information Technology — Specializing in Data Science 2024 – Present

Sri Lanka Institute of Information Technology (SLIIT) — Faculty of Computing, SLIIT Northern Uni

TECHNICAL SKILLS

Data Science & ML: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Pandera, Jupyter Notebook, Google Colab

AI & NLP: Large Language Models (LLMs), Natural Language Processing, Machine Learning

Databases: MySQL, MongoDB

Programming Languages: Python, Java, JavaScript, C

Web & Mobile: React Native, Node.js, Express.js, Spring Boot, React.js, HTML, CSS

Tools & Platforms: Git, GitHub, VS Code, Postman, IntelliJ IDEA, Expo

Core Concepts: Data Analysis, EDA, Statistical Modeling, OOP, Agile & Scrum, MVC Architecture

Operating Systems: Ubuntu (Linux Basics)

ACADEMIC PROJECTS

Automatic Recipe Generation Using LLMs

Y2S1, 2025

Python | Machine Learning | Large Language Models | NLP

- Researched and built an AI-powered recipe generation system using Large Language Models, producing accurate, ingredient-constrained recipes from user-provided inputs.
- Utilized NLP and machine learning techniques in Python to improve output relevance and quality, demonstrating end-to-end ML pipeline development as part of a collaborative team.

Smart Clinic Management System (Mobile Application)

Y2S2, 2026

MongoDB | Express.js | React Native | Node.js (MERN Stack)

github.com/TharsikaKanthavel/Smart-Clinic-Management-System

- Architected a full-stack clinic management mobile application supporting 4 core modules: patient records, doctor scheduling, hall allocation, and appointment booking, built collaboratively with a team.
- Engineered and implemented MongoDB schema for flexible, scalable healthcare data management with JWT-based role-based access control; led development of the Appointment Management module.

SAAI POS System (Real Client)

Y2S2, 2026

JavaScript | JSX | NoSQL Database

github.com/TharsikaKanthavel/POS-System-

- Engineered a full-stack Point of Sale system for a real client as part of a team, streamlining sales transactions, billing, and inventory management across 3 core modules.
- Created a NoSQL database structure for real-time product and sales data processing, gaining experience in data modeling for transactional systems.

Toy Store Management System

Y1S1, 2024

Spring Boot | MySQL | RESTful API | JWT Authentication

github.com/TharsikaKanthavel/Toy-Store-OOP

- Built a full-stack inventory and sales management web application with structured relational data modeling in MySQL, as part of a team project.
- Applied MVC architecture and OOP principles to build a maintainable, scalable codebase.

Vehicle Rental System

Y1S2, 2025

Java | Spring Boot | MySQL | RESTful API | JWT Authentication

github.com/TharsikaKanthavel/Vehicle-Rental-System

- Built a full-stack vehicle rental management platform with real-time availability tracking and secure authentication, delivered collaboratively as part of a team.
- Planned a normalized MySQL database schema and RESTful API for efficient data retrieval and management.

Arduino-Based Smart Home Security & Rain Detection System

Y1S1, 2024

Arduino | Sensors | Embedded Programming

- Designed a smart home monitoring system using Arduino with motion-sensor intruder detection and rain detection capabilities.
- Programmed the microcontroller to process sensor data and trigger automated alerts, demonstrating practical IoT and embedded systems knowledge.

ACHIEVEMENTS & RECOGNITION

AI Research Poster Exhibition — Second Place

October 2025

SLIIT Northern Uni, ThinkAI Expo 2025

- Presented AI research on Automatic Recipe Generation Using LLMs; awarded Second Place among competing projects.
- Received an official certificate recognizing innovation and research contribution.

CERTIFICATIONS

- Introduction to Data Science — Cisco Networking Academy, June 2026
- Introduction to R — DataCamp, June 2026
- Introduction to Modern AI — Cisco Networking Academy, May 2026
- Pandas — Kaggle, June 2026
- Encoder-Decoder Architecture — Google Cloud Skills Boost, June 2026
- Certificate of Scholarship Award & Leadership Training — January 2025

SOFT SKILLS

Analytical Thinking, Problem Solving, Critical Thinking, Attention to Detail, Teamwork, Communication, Time Management, Fast Learner, Adaptability

LANGUAGES

English, Tamil
